

Ergonomic
Vast Adjustment
Rotating Seat

The Mobi Pro Flexi is an ergonomic and compact mobile assistive mobility device ideal for people with low leg strength and some trunk balance who experience difficulty walking. The Mobi Pro Flexi is an excellent safe patient handling solution for early mobilization. It offers support while standing and is an efficient device for patient transfers, improving safety and efficiency.

Rotating Seat

The Mobi Pro Flexi is an efficient and safe tool for the healthcare provider to move a patient, improving safety and caregiver time management. It features rotating padded seats and knee support for easy application. The feet are placed on a solid, firm footplate and then the patient pulls himself/herself up to a standing position using the integrated solid bracket. By simply rotating the seat cushion, the Mobi Pro becomes a comfortable seat that the patient can rest and be moved on.

Versatile Design

Using the Mobi Pro Flexi not only encourages mobilization and activity but gives the caregiver fast, stable and safe transport of a

patient to the bed, chair or the toilet and back if needed. The Mobi Pro Flexi is equipped with a mechanical mechanism to spread the legs, ensuring it will work with most seating (like a toilet or wheelchair). The vast adjustment range is easily set to three settings with a lever.

Quality

Our products are designed and manufactured to meet all the requirements of relevant standards. At every stage of the development process, every single product is given extensive attention in design, development and manufacturing. This means that a user of this product feels confident with its reliability and the caregiver feels confident with its safety.

standards, including ISO
14971, EN12182, MDD
93/42/EEG.

Features

Easy Movement
The Mobi Pro Flexi is
easily moved by a single
caregiver. A small turning
radius makes it ideal for
smaller spaces.

Adjustable Base
Manual adjustment of
legs allows it to fit under
most seating.

Padded Rotating Seats
Allows device to be
used for seating as
an alternative to a
wheelchair.

Padded Knee Pad
Soft, cushioned knee pad
to add patient comfort
and reduce device
pressure at the knees
while standing.
