

Our Niklas freestanding gantry system offers a unique way to safely and easily move patients without strain to the patient or caregiver. Designed for use with our series of ceiling lifts, the Niklas is portable and can be disassembled for easy transport. The Niklas is adjustable in height and width and requires no tools for assembly.

Portable Solution

The Niklas freestanding gantry system can easily be assembled without the use of tools. Unassembled, it can easily be transported in the carry case to be used between different locations like a home and cottage, or even in hotel rooms. It features dual wheel casters for maneuverability and strong handles for easy movement. The adaptability of this gantry makes it an ideal option for temporary needs or rentals.

Adjustable

The unique design of the Niklas gantry allows it to be adjusted in both height and width, making it an extremely versatile gantry for moving patients from a bed, wheelchair, toilet or floor. The casters all lock into position for

added safety while the gantry is in use. The Niklas comes complete with a rail roller so it is ready for use with our portable lift systems.

Quality

Our products are designed and manufactured to meet all the requirements of relevant ISO, UL, IEC and EN standards. At every stage of the development process, every single product is given extensive attention in design, development and manufacturing. This means that a user of this product feels confident with its reliability and the caregiver feels confident with its safety.
