stretcher series 500

Function as Appealing as its Form

Pedigo's 500 Pediatric Crib Stretcher, with its full function capabilities represents the standard of excellence in hospital cribs. The aesthetically pleasing design makes it perfect for any facility.

Casters

As a pediatric transport stretcher, the 500 rolls easily on 5" oversized casters. Two of the four casters lock to secure the stretcher while a third steering caster may be engaged for increased control and maneuverability.

Total Accessibility

The unique rounded corners reduce the overall size of the 500, yet provide the same amount of useful area on the 26½" x 55¾" mattress.

The two-post support system provides 97% access to the patient by the medical team.

Side Rails

Side rails have two-inch bar spacing and a special epoxy finish that is warmer to the touch than chrome.

A True One-Handed Crib

For complete containment of the child, simply raise the counter balanced side rails to enclose the crib. Because the rails are counter balanced, there will be no sudden drop when released, preventing injury to the child or provider.

Dual-action release handle is childproof and easy to operate, even with a child in one arm.

Crib Security Handle

Squeeze Handle Together

Lift Rail Upward or Downward

LATEX-FREE

stretcher options

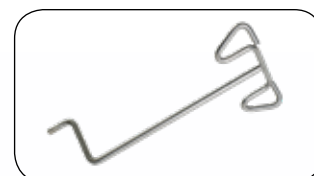

FIXED SECURITY TOP

Clear molded security top has an exclusive quick disconnect for fast, easy removal.

SECURITY TOP - REMOVABLE

Clear molded security top has removable window for access into the croupette and crib.

IV POLE

IV poles allow for bottles or bags to be suspended inside or outside the stretcher area.

UTILITY SHELF

Located at the base of the stretcher, utility shelf may be used for storing blankets or the child's personal items.

O₂ HOLDERS

O₂ holder for E-size oxygen tank.

Also available is Pedigo's 5114001-1 O₂ Tank Holder to accommodate tanks with longer O₂ regulators.

CRIB BUMPER PADS

Siderail Bumper Pads measures 2" thick and 7" high. Standard, baby soft white color.
